PROFILE

Frontend developer building responsive web experiences with Vue, Nuxt, React and TypeScript. Founder of Söyle and co-founder of Chatra, turning complex learning workflows into accessible interfaces, API-connected products and algorithm-driven experiences.

FRONTEND ENGINEERING SKILLS

Frontend: JavaScript, TypeScript, Vue 3, Nuxt 3, HTML, CSS, responsive layouts

Engineering: Reusable components, REST API integration, authentication, state management, UI testing, accessibility

Additional stack: React, Next.js, Flutter, Dart, Python, FastAPI, PostgreSQL, Docker, Git, GitHub

EXPERIENCE

FRONTEND DEVELOPER

Jun 2025 - Dec 2025 | Confidential product

- Developed user-facing features and UI flows for a confidential product, integrating application logic with REST API data.
- Debugged interaction and data-loading issues and refined interface behavior during feature delivery.
- Used Git and GitHub for version control, iterative changes and release coordination.

CO-FOUNDER & PRODUCT DEVELOPER - CHATRA

Dec 2025 - Sep 2026 | Nuxt/Vue web | Flutter mobile | FastAPI/PostgreSQL

- Co-founded a learning platform with role-based student, teacher and admin experiences for classes, assignments and submissions.
- Worked on API-connected interface flows for learning content, authentication, permissions and document interactions across clients.
- Contributed to automated assignment checking and AI-assisted feedback workflows, helping teachers streamline coursework review.
- Coordinated frontend, mobile and backend work across REST APIs, file uploads, notifications and multilingual features.
- Added automated coverage across 30 unit/widget test files and five integration-test files for critical mobile workflows.

FOUNDER & FRONTEND / PRODUCT DEVELOPER - SÖYLE

Current startup | React / Next.js / TypeScript | Rule-based personalization

- Founded a speech-practice platform for children with alalia; developed responsive, child-focused interfaces for interactive exercises, AAC and home practice.
- Built guided activity flows with touch-friendly interactions, hints, feedback and parent-facing progress and observation features.
- Connected practice and parent interfaces to an explainable, rule-based adaptive planner that uses accuracy, independence, preferences and recent results to tailor exercises.

SELECTED WEB PROJECT

Digital Urpaq | Vue / Nuxt - Developed a web platform for extracurricular education workflows, connecting the frontend to FastAPI and PostgreSQL.
